Descrizione

From the Refuge Alpe Soglia we follow the dirt track back to Alpe Soglia 1720 m; from here, rather than follow the route to the summit, we turn left along the Tre Vallate Route along a grassy dirt track to Alpe Turinetto 1818 m where the dirt track becomes a pathway up to join the Alta Via Canavesana Route that starts from monte Soglio. We reach a high tension pylon and along a transverse halfway up the hill we reach a hollow and the foot of the Uja's southernmost summit, where we find the ruins of the Alp with the same name, 2026 m. We descend slightly (follow directions towards the stream) to some quartz rocks, where the pathway climbs again halfway up the hillside through some stretches of detritus. Here we arrive at Bric Volpat 2038 m to then continue almost completely along the mountain ridge, with some rises and descents until we reach the Croce d'Intror Hill 1950 m (2 hours from Monte Soglio). From the Colle della Croce d'Intror along the summit we reach Cima dell'Angiolino 2168 m and immediately afterwards Monte Vaccarezza 2203 m. Following the ridge we quickly reach Monte Croass 2155 m and then descend a steep grassy stretch to the Alp Pertus. From the 408/A junction, we descend towards Borgata Salvin in Monastero di Lanzo where we can find overnight accommodation and restaurant at the Salvin Refuge/Farmhouse.
