195 m

Descrizione

The path are characterized as an itinerary of discovery of the Monferrato. In its path it allows to explore all the specificities of this territory.

Starting from Frinco, it runs along the hills of the Rilate Valley in wooded hills and with an extraordinary nature in the Valleandona, Vallebotto and Valgrande reserve. In this natural context the anthropic presence has strongly characterized the places, which in the Middle Ages were historically linked to the bishopric and the Municipality of Asti in conflict with the Marquisate of Monferrato.

The villages were located on the hill tops and with their castles still seem to control valleys and roads today. The route in the north-eastern area of Monferrato continues up the hills of the Valle Versa and the heights of the Tanaro valley, where the human presence predominates over natural features, the hills have a greater agricultural exploitation linked to the cultivation of the vine combined with the exploitation of geological resources given the numerous Quarries and sulfur sources (linked to the geology of the places). This area is also strongly characterized by the hilltop villages and castles linked to the Aleramic domain of the area and its ancient conflict with the Municipality of Asti.
