Descrizione

From La Palà ascend along path 105 through pastures towards the locality of Valanza (1750 m). From here, the path descends gently to the Alpe degli Ivert (1465 m). For a more panoramic variation, from Valanza follow the dirt road that, leaving path 110 on the left, reaches Punta del Fin (1586 m) across rocky pastures with a beautiful view of Val Pellice, and then descends to the Alpe degli Ivert. Following the dirt road, after about one km you meet the junction with path 161 on the right, that arrives from the Ciavot della Vedova - Bric. Continue, staying on route 105, until you reach the locality of Regardour (1324 m). Continue on, taking the path that leads to Colle del Casulè (1310 m). After crossing a densely wooded area (designated Site of Community Importance of Pian Prà) you arrive at the locality of Pian Prà (1152 m), a wide, flat depression on the wooded ridge between Torre Pellice and Rorà. From here a short detour along the dirt road to the east leads to the panoramic viewpoint of Rocca Bera. From Pian Prà, leave path 105 to follow path 106 up to Fontana Badel and the Chiotin meadows (900 m). The path continues on to arrive at Costa Lurens (700m) and further on still the locality of Rocchetta. Cross the Albertenga Bridge and reach the hamlet of S. Margherita and the centre of Torre Pellice.

The stretch between the localities of La Palà and Pian Prà is passable during the winter season with snowshoes.
