Descrizione

From Camoglieres you have the opportunity to walk along the scenic "Sentiero dei Ciclamini" (Cyclamen path), which runs along the limestone cliffs of Crocetta Soprana and Punta Raveirola (via ferrata and equipped cliff) in a fascinating environment with the rich spring flowering of orchids and late summer cyclamen. When you reach Langra hamlet, follow the signs for Centenero / Caudano, uphill until you reach 1296 meters and then along a hillside up and down path. Once you arrive at Caudano hamlet, take a few minutes to admire the ancient lazzaretto (1463 AD). The itinerary continues with a constant trend; the panoramic view just beyond is breathtaking: the gothic bell tower of the church of San Peyre di Stroppo (13th century) with the border peaks of the upper valley in the background and the village, perched on steep slopes, of San Martino, destination of the stage. To get there, the path reaches Cucchiales and Ciamin Hamlets.
